

Idiqlat - Design

The Idiqlat font supports the East Syriac style of the Syriac script. The original font on which Idiqlat was based was an [OFL](#)-licensed typeface called **East Syriac Marcus**, designed as a revival of metal type. However, significant design changes have been made in order to modernize and optimize the font for web and mobile use. The Latin letters were imported from Crimson Pro.

Three fonts from this typeface family are included in the *Idiqlat* release:

- Idiqlat ExtraLight
- Idiqlat Light
- Idiqlat Regular
