

Idiqlat - Design

The Idiqlat font supports the East Syriac style of the Syriac script. The original font on which Idiqlat was based was an [OFL](#)-licensed typeface called **East Syriac Marcus**, designed as a revival of metal type. However, significant design changes have been made in order to modernize and optimize the font for web and mobile use. The Latin letters are a subset of the [Crimson Pro](#) font.

Three fonts from this typeface family are included in the *Idiqlat* release:

- Idiqlat ExtraLight
- Idiqlat Light
- Idiqlat Regular
